Foundation for Orthopedic Trauma

Thursday March 1, 2012

**MERIN (Medical Education and Research Institute of Nevada)
874 American Pacific Dr.
Henderson, NV
702-856-2610**

Who Should Attend:

This program is designed for orthopaedic residents at the PGY2-3 level.

10-11am

Registration, early lunch

11-11:30 am

Introduction and overview

11:30am-1:30pm

Section 1- Smith Peterson and Posterior Approaches to the Hip

- Lecture: Applied Anatomy
- Demonstration and Lab:
Dissection of the hip

Break

1:30-2:15pm Lunch

2:15-3:45pm

Section 2- Distal Femur and Anterolateral Approach to the Proximal Tibia

- Lecture: Applied anatomy
- Demonstration and Lab:
 - Dissection around the knee
 - Posterior medial approach to the plateau
 - Direct posterior approach to the knee for plateau with takedown of Medial Gastroc

3:45-5:30pm

Section 3- Leg

- Lecture: Applied anatomy
 - Demonstration and Lab:
 - Dissection and compartment release of the leg
 - Posterior lateral approach to the ankle for posterior malleolus Fracture
 - Anterior approach for Pilon
- Adjourn

5:30pm Adjourn

Course Overview

Review the anatomy of and learn approaches to the lower extremity through hands-on practical anatomic dissections as taught by leading experts in orthopaedic traumatology.

Educational Objective

At the conclusion of this educational activity, participants should be able to:

- Perform all of the major approaches to the hip, knee, tibia, ankle
- Compare and contrast the most useful approaches to address a particular lower extremity fracture
- Understand the anatomical considerations required to safely execute approaches to the lower extremity.
